VENKATA KALYAN NIDAMARTHI

nidamarthi.venkatakalyan@gmail.com in/kalyan646 kalyan646.github.io/portfolio

PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience analyzing operational and business datasets to deliver actionable insights and improve reporting efficiency. Skilled in SQL, Power BI, Tableau with experience in dashboard development, KPI tracking and data cleaning. Strong collaborator with experience supporting cross-functional teams and translating business requirements into analytical solutions.

SKILLS

Data Visualization: Power BI, Tableau, AWS QuickSight
Data Management: SQL Databases, Data Cleaning, ETL Processes
Soft Skills: Problem-Solving, Analytical Thinking, Stakeholder Management, Leadership
Programming: SQL, Python

EXPERIENCE

Data Analyst – Averosoft Inc **October 2024 – July 2025**

- Supported Power BI and Tableau dashboards tracking 5 operational KPIs for reporting and performance monitoring.
- Assisted in integrating external and internal datasets, improving reporting accuracy and usability.
- Automated recurring reporting tasks using SQL and dashboard workflows, reducing manual effort by approximately 15%.
- Collaborated with cross-functional teams to gather business requirements and deliver analytical reports.
- Supported analysis of large datasets for A/B testing and operational performance evaluation initiatives.

ML Data Associate II – Amazon India Development Center **May 2019 – December 2022**

- Assisted with operational datasets containing 80k+ monthly records while maintaining 95%+ accuracy standards.
- Supported SQL-based dashboards tracking 8 KPIs, improving reporting turnaround by 10%.
- Partnered with stakeholders to translate business needs into technical tasks and documentation.
- Mentored 6 associates, contributing to a 12% improvement in team productivity.
- Improved data workflows by identifying bottlenecks and reducing processing time.

PROJECTS

Cardiovascular Disease Prediction

- Analyzed machine learning models using Python to predict heart disease risk using patient health records.
- Processed and analyzed 300+ patient records with 14 clinical attributes from the UCI ML repository dataset.
- Performed data cleaning, missing value handling, outlier removal, and feature correlation analysis to improve data quality.
- Evaluated 8 machine learning algorithms including Logistic Regression, Random Forest, KNN to identify the best-performing model.

AI in Amazon Logistics

- Analyzed AI and machine learning applications used in Amazon Logistics to improve supply chain efficiency and delivery operations.
- Reviewed 15+ AI-driven technologies and logistics use cases including recommendation systems, fraud detection, drones, robotics, and autonomous delivery.
- Evaluated 3 operational problem statements related to address validation, counterfeit detection, and last-mile delivery optimization.

EDUCATION

Master of Science, Information Technology – Clark University, USA, GPA: 3.68 **2024**
B.Com, General – Bhavan's Vivekananda College, Hyderabad, India, Score: 69% **2018**

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate
IBM: SQL and Relational Databases
IBM: Python for Data Science
