SUMMARY

Results-Oriented Data Analyst with 4 years transforming datasets into actionable insights. Reduced manual effort by 1% through automated reporting and improved decision-making efficiency. Expert in SQL, Power BI, and Tableau with proven stakeholder collaboration skills. Dedicated to maintaining high data integrity and delivering clear, actionable reports. Experienced in cleaning and organizing messy data to uncover meaningful insights.

EXPERIENCE

Data Analyst | Averosoft Inc

May 2025 - August 2025

- Supported Power BI and Tableau dashboards tracking 8 operational KPIs for reporting and performance monitoring.
- Assisted in integrating external and internal datasets, improving reporting accuracy and usability.
- Automated recurring reporting tasks using SQL and dashboard workflows, reducing manual effort by approximately 15%.
- Collaborated with cross-functional teams to gather business requirements and deliver analytical reports.
- Supported analysis of large datasets for A/B testing and operational performance evaluation initiatives.

ML Data Associate II | Amazon India Development Center

May 2019 - January 2023

- Analyzed 220k records/month with 97% accuracy across operational datasets.
- Supported SQL-based dashboards tracking 8 KPIs, improving reporting turnaround by 10%.
- Partnered with stakeholders to translate business needs into technical tasks and documentation.
- Mentored 6 associates, contributing to a 12% improvement in team productivity.
- Improved data workflows by identifying bottlenecks and reducing processing time.

PROJECT

Industry Trend Analysis Using Splunk

- Analyzed 500K+ records across 50 states, creating 12 visualizations identifying 3 key market trends.

Cardiovascular Disease Prediction

- Built ML model analyzing 70K patient records with 85% accuracy for early risk detection.

Strategic Expansion of Ride-Sharing Services

- Analyzed 15 metropolitan regions, identifying 5 expansion zones with 23% growth potential.

AI in Amazon Logistics

- Reviewed insights from 15+ sources across 3 logistics problem areas, outlining 5 practical AI use cases for operations improvement.

EDUCATION

Master of Science | Information Technology

Clark University • Worcester, MA • 2024 • 3.68

Bachelor of Commerce

Bhavan's Vivekananda College • Hyderabad, India • 2018 • 69%

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate

IBM:SQL and Relational Databases

IBM: Python for Data Science

SKILLS

Soft Skills: Problem-Solving, Analytical Thinking, Stakeholder Management, Leadership

Programming: SQL, Python

Data Visualization: Power BI, Tableau, AWS QuickSight

Data Management: SQL Databases, Data Cleaning, ETL Processes
